

# DST TALKS

$u^b$

b  
UNIVERSITÄT  
BERN

## **15.00 - Dr. Cocco Fabrizio (Università di Cagliari)**

The lithospheric structure of the Corsica-Sardinia block: relationships between isostatic disequilibrium, geomorphic features and neotectonics

## **15.30 - Prof. Lanari Pierre (University of Bern)**

An iterative approach and software solution for modeling local equilibria (Bingo-Antidote)

## **16.00 - Dr. Forshaw Jacob (University of Bern)**

Testing the White et al. (2014) solution models' ability to reproduce natural mineral assemblages, modes, and compositions in bulk compositionally diverse metapelites

**January, Friday 27th at 15.00, Aula Ruffini,  
Department of Earth Sciences, University of Turin  
Via Valperga Caluso 35, 10125**
