

# SPRING 2022

## Lecture series.

### 31.03.2022

Rowan Martindale  
*University of Texas at Austin*  
15:00 UTC

Early Jurassic Reefs from Morocco - new insights on environmental perturbations, coral extinctions, and reef recovery in tropical mixed carbonate-siliciclastic settings.

### 05.05.2022

Brian Rosen  
*Natural History Museum*  
15:00 UTC

Empires, plate tectonics and climate change: a brief history of coral reef studies. A conversation with Brian Rosen.

### 26.05.2022

Wolfgang Kiessling  
*University of Erlangen-Nuremberg*  
14:00 UTC

Vulnerability of reefs and reef builders to climate change across time scales.

### 30.06.2022

Gregg Webb  
*University of Queensland*  
10:00 UTC

Microenvironments in Modern and Ancient Reef Framework Construction.

All lectures will be conducted via Zoom.

Registration for this series can be made here: <https://tinyurl.com/IFCRS2022>
