

MagellanPlus Workshop: Navigating the IODP Proposal System

MagellanPlus Workshop

Navigating the IODP Proposal System

A 3 day Workshop for PhD and Early Career Researchers

24th-26th September 2018

National Oceanography Centre Southampton
University of Southampton

The MagellanPlus Workshop Navigating the IODP Proposal System addresses **PhD and Early-Career Researchers** and will be held from **24-26 September 2018**, at the **National Oceanography Centre Southampton**, University of Southampton, UK.

Through informative introductory lectures by some of Europe's most experienced ocean drilling scientists and active participation in group writing exercises, the early-career delegates will work together in teams to develop hypothetical drilling proposals. These will then be presented to a Science Evaluation Panel for feedback and eventual selection of a winning team. There will be opportunities for each delegate to present their science as posters and short "3 minute thesis"-style introductory pitches.

Spaces for this workshop are limited. You are invited to apply by **1 August 2018** via <https://nerc.ukri.org/research/funded/programmes/ukiodp/news/proposal-workshop/>
