

SHORT-COURSE

«Field data analysis and structural interpretation of 3D virtual outcrop models with Open Plot»

September 30th, 2022 – 9:00-13:00 (Virtual Room)

Prof. Stefano Tavani

*Structural geologist at the University of Naples
Associated Researcher at the CNR-IGAG*

Abstract: this 4 hours short-course will provide an overview of the Open Plot software, with lectures illustrated by exercises on real case examples of field structural data analysis and 3D virtual outcrop models interpretation.

This 1 CFU training is aimed at appealing to master and doctoral students, and early career researchers.
