

Short Course**Thermometry, chronometry, barometry and fluid geochemistry in sedimentary basins****Dr. Marta Gasparrini****GeoRessources Departement, IFP Energies nouvelles
Rueil-Malmaison, France****17-21 September 2018****Dipartimento di Scienze, Università "Roma Tre"****Where: Blocco Aule - Largo San Leonardo Murialdo, 1 - Roma****September 17st**

Morning session: Carbonate diagenesis: why we care

Afternoon session: Tools for integrated studies: Fluid Thermometry & geochemistry

September 18th

Morning session: Tools for integrated studies: Relative / absolute chronometry

Afternoon session: Applications to basin / reservoir scales

September 19th

Morning and afternoon sessions: Applications to basin / reservoir scales

September 20th

Morning and afternoon sessions: Fluid Barometry and application

Afternoon session: Future Perspectives

September 21st

Morning session: Open session with PhD students

Question time and short breaks will be managed by the speaker during lecture time. For further infos and registration contact sveva.corrado@uniroma3.it
